

A Financing Framework for the 2021 ACT-A funding gap

3RD FACILITATION COUNCIL

14 DECEMBER 2020

ACT now, ACT together to accelerate the end of the COVID-19 crisis

An informal Financing Working Group was established to explore a broad range of potential funding mechanisms for an overall **ACT-A Financing Framework** that could be considered by the full Facilitation Council at its 3rd & 4th meetings

Financial Working Group Members

Chair: Norway

Members: Italy, UK, Germany, Indonesia, Mexico, South Africa, European Commission

Ways of working

Two working group meetings/week (5 to date)

Intersessional preps supported by the Hub

Review:

- Working Group: Finance/Treasury staff
- Economists: J. O'Neill, O. Blanchard, P. Romer
- ACT-A Principals: P. Sands, D. Peters, M. Pate, V. Dzau, J. Farrar

Deliverables

A proposed ACT-A Financing Framework

Supporting analyses, including:

- full landscape of innovative financing mechs
- deep dives on major funding mechanisms (incl. private sector review with ICC & GC)

ACT-A investments complement the overall COVID-19 response by increasing **speed & equity** in the development and delivery of both **scarce & widely available** essential tools

The ACT-A's \$28.1b funding gap for 2021 is distributed across its value chain and over time; 80% of the current gap is for procurement

Total ACT-A funding gap by period – in USD billion

Funds for:

- Acceleration
- Products available but scarce
- Products available in large quantities
- Products not yet available

Financing options for ACT-A can be evaluated based on the complexity & time to set-up, the ability to direct the financing to ACT-A and size

Classification of potential ACT-A financing mechanisms by speed of funding, opportunity to earmark for ACT-A, and potential size – details in separate Annex

NOTE: Direct 'ACT-A funding' refers to mechanisms that earmark funds directly to ACT-A; Semi-direct funding refers to mechanisms that earmark funds to COVID-19 related health issues; Indirect funding refers to mechanisms that do not allow earmarking or with low earmarking & tracking possibility. 'Time to unlock funding' refers to how fast funds can be disbursed for development purposes

Source: Experts interviews; BCG analysis

Even with a mix of new financing mechanisms, there would still need to be a substantial increase in direct grants from HICs/UMICs & investment by LICs/LMICs to fully finance ACT-A

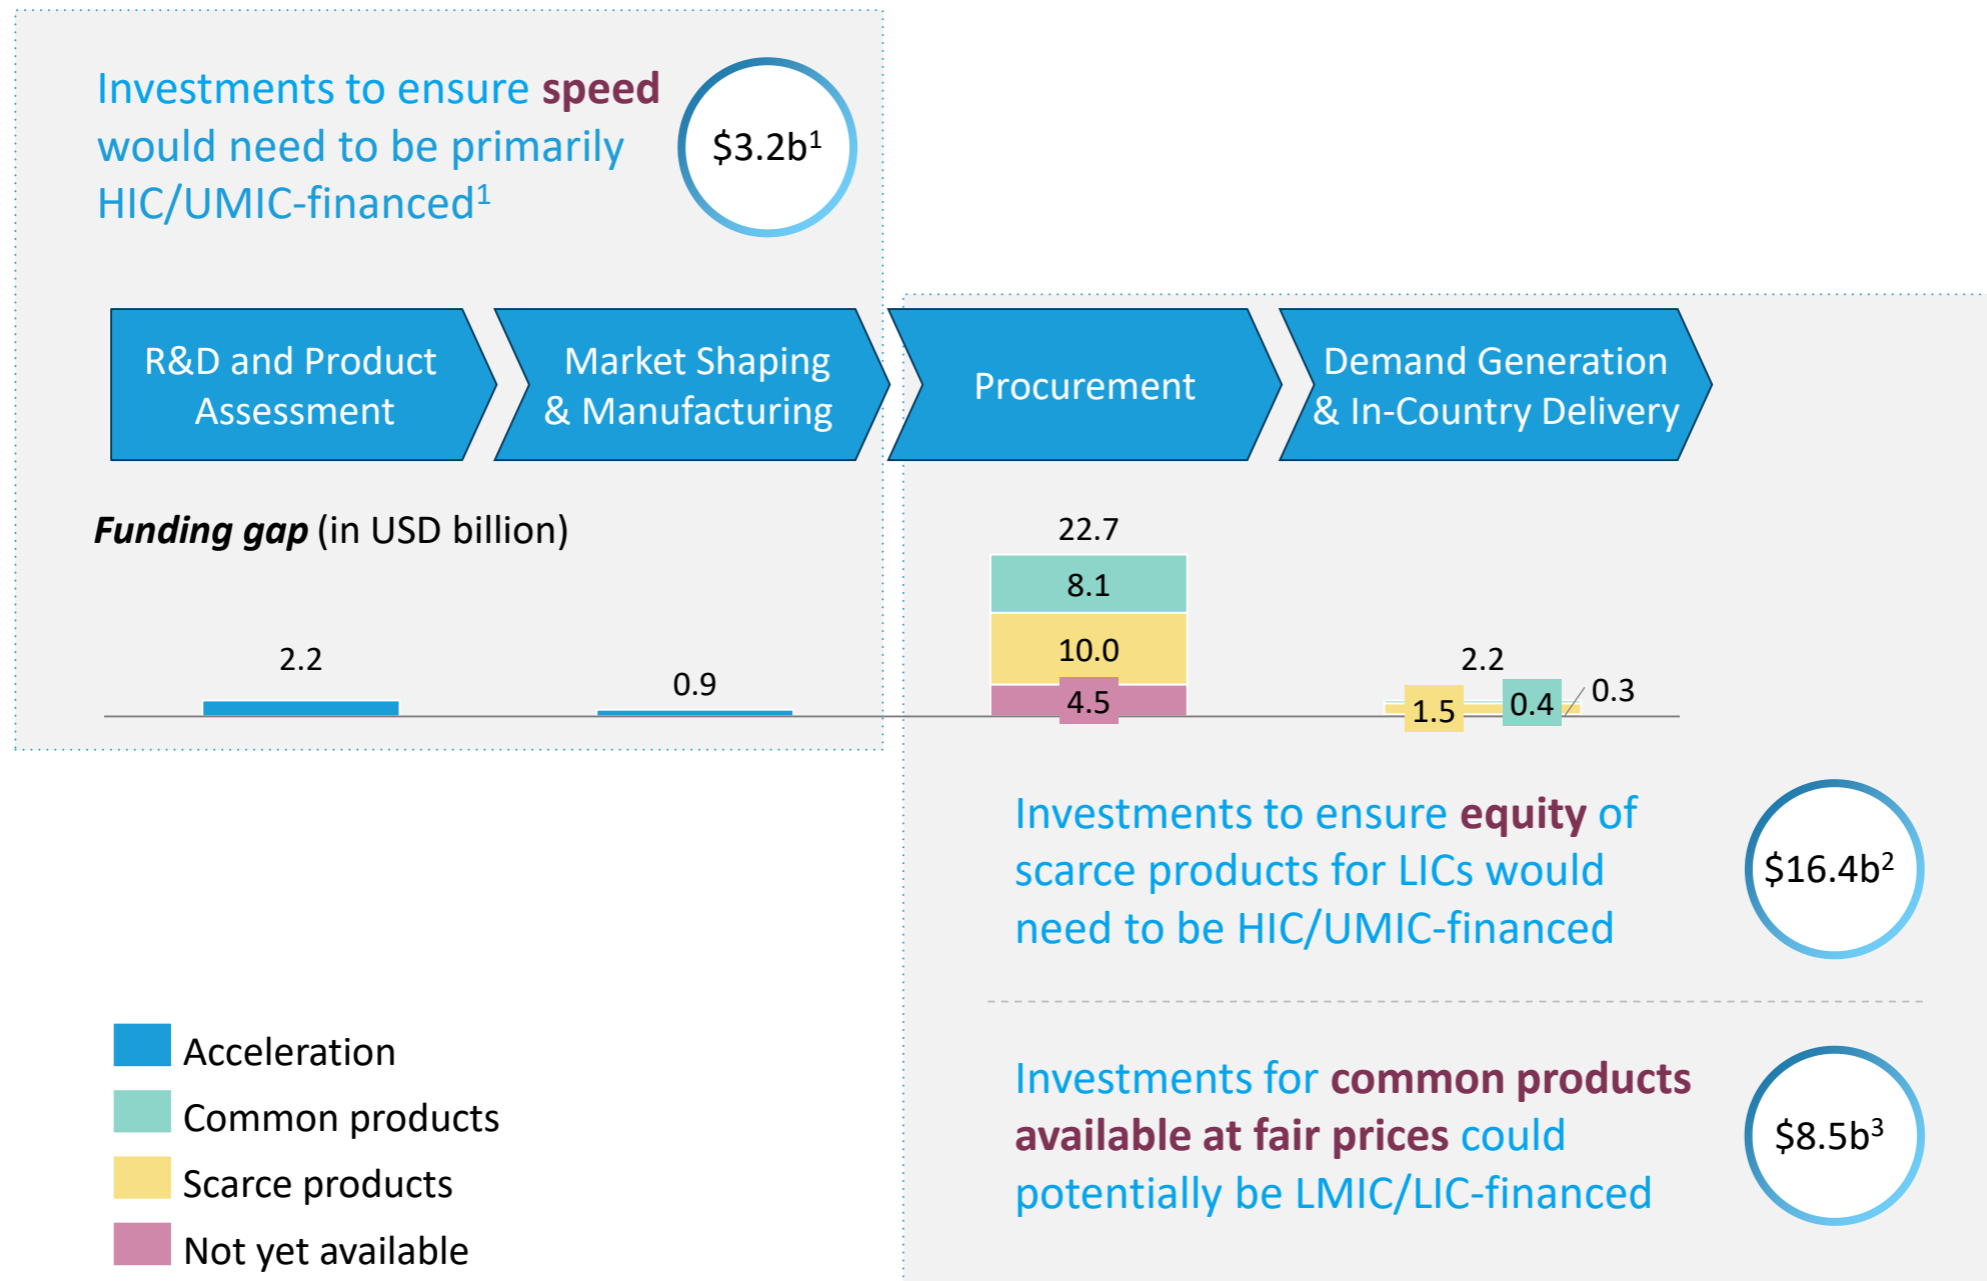

ACT-A Financing Framework to close the 2021 gap – in USD billion

Feasibility & funding potential of different financing mechanisms for ACT-A

ACT-A Goal	1 ^o financer	Gap	Feasible	Potential	Maybe	Potential	Not feasible
Speed	HICs/UMICs	\$3 B	(A) Existing ODA	\$3 B			New tax SDR
Equity	HICs/UMICs	\$16.5 B	(B) Private sector grants	\$1.5 B	IFFIm (Vaccines only)	?	New tax SDR
			(C) Social Bonds	\$3 B	(E) Exceptional additional ODA	\$12 B	
Common products	LICs/LMICs	\$8.5 B	(D) WBG MPA	\$3 B	(F) MDB loans, buy-downs, SDR, LSF ¹	\$5.5 B	New tax Debt swap
TOTAL		\$28 B		\$10.5 B		\$17.5 B	

1. Liquidity & Sustainability Facility

Framing ACT-A's value chain & needs in terms of its goals of 'Speed' (accelerated product dev.) & 'Equity' informs financing options

1. These activities generate global public goods, primarily through multilateral and private sector investment;
2. This does not include domestic procurement of therapeutics already anticipated in the Tx investment case (80% of UMIC procurement, 40% for LMIC).
3. This does not include the domestic spending anticipated in the HSC investment case: \$ 6.8 Bn on UMIC, LMIC and LIC products for PPE and Oxygen.

COVID-19 is an historical exception, that has triggered exceptional public spending and should be able to unlock **exceptional additional ODA**

>1.5m deaths, with many countries going into a 2nd winter with uncontrolled COVID

The >US\$12 Trillion in fiscal stimuli dwarfs even the Global Financial Crisis of 2008-9

Size of stimulus package –
IMF covid-19 policy tracker, in \$Bn

IMF World Economic Outlook Report (7 Oct) fully supports the ACT-Accelerator Investment Case

"...if medical solutions can be made available faster and more widely **relative to our baseline, it could lead to a cumulative** increase in global income of almost \$9 trillion **by end-2025**"

IMF World Economic Outlook, October 2020

*Addressing ACT-A's urgent needs
=
only **1 day** of that income and
would save countless lives*

Weekly Number of cases by region, in million

Source: full report [here](#) and IMF blog [here](#)

ACT-A impact | Bridging the funding gap will help save 3,000 lives per day and restore the global economy

Direct Impacts

Vaccines

2bn doses delivered by end 2021, covering 20% of LIC/LMICs population

Therapeutics

245 million Therapeutics courses in LIC/LMICs by mid-2021

Diagnostics

500 million tests in LIC/LMICs by mid-2021

Health System connector

Strengthened health systems to deploy covid-19 tools in efficient way

Indirect impacts

Restore the global Economy

Fast & equitable access to Covid-19 tools could generate +\$9 Trillion in global income by 2025¹

Resume Education

Help 320 million students who are out of school due to the pandemic resume their learning²

Avoid 3,000 deaths per day³

Significantly reduce global Covid-19 mortality through training & tools

1. Source IMF World Economic Outlook, Oct 2020; 2. As of 09 Dec 2020; Source UNESCO; 3. Assuming 80% of deaths of infected patients could be avoided from Q3 2021 onwards with mortality rate of infected patient of 2.28%, Source WHO covid-19 dashboard; BCG analysis

Return on Investment (RoI) for Selected Donor Countries

Different methodologies all show multiplier >1 across G20 countries

Multiplier by scenario² - in # (logarithmic scale)

1. Country not represented on the graph are Argentina, India, Indonesia, Mexico, Russia, Saudi Arabia, South Africa; 2. Benefit of investing in ACT-A divided by 'Ask' by country as estimated by ACT-A Hub; 3. GDP potential savings divided by ask by country; 4. delta in GDP from baseline vs. scenario 4 divided by ask by country

What is in & out?

What is collective and what is self-financing?

ACT-A investments complement the overall COVID-19 response by **increasing the Speed & Equity** of the development and delivery of essential tools

	Multilateral	Domestic
ACT-A	Drive investments to deliver speed (e.g. R&D support) and equity (e.g. allocation mechs & prepare LICs delivery)	Co-financing of procurement and delivery Guaranteed equitable access through fair prices & reservations
COVID-19 Response & Recovery	Support investments in health systems strengthening Support implementation of ACT-A tools	Core structural investments in health systems Procurement for bilateral deals

Next Steps

- 1 Incorporate Facilitation Council feedback on the Financing Framework
– *Co-Chairs*
- 2 Refresh each Pillar's strategy in the context of the 'vaccines era' (by 21 January)
– *Pillars*
- 3 Update each Pillar budget accordingly, with a cost breakdown across the value chain & by quarter (incl. costs that may be incurred in 2022)
– *Pillars*
- 4 Initiate a process to establish a social bond that can front load financing for the ACT-A needs
– *Co-Chairs & FC Members*
- 5 Begin consultations to establish political buy-in & support for a 'refreshed' ACT-A Strategy & Budget for 2021 and a Financing Framework to support it
– *Co-Chairs & FC Members*

Appendix

Analysis of the feasibility & potential of the proposed financing mechanisms to close the ACT-Accelerator funding gap

Existing ODA | Although most ACT-A funding came from ODA in 2020, a realistic expectation from ODA financing in 2021 may be **\$3 bn**

Total Health ODA disbursements were growing at the World GDP growth rate since 2009 (+4% per year)

The historical trend and recent developments in ODA suggest that \$3B may be a realistic expectation for ACT-A in 2021

Total Health ODA, in USD billion¹

Historical trend

- ODA is unlikely to maintain its historic growth rates over 2021 (and beyond)
- The ACT-A ‘ask’ should not result in a step back for other Global Health issues/priorities funding
- The variance in ODA over the last 5 years suggests a \$3Bn opportunity for new initiatives
- A realistic (and yet optimistic) expectation for ACT-A from current ‘health ODA’ budgets is **US\$3 Billion for 2021**

NOTE: Comparison with 3 major global diseases

- HIV, TB & malaria are funded up to \$9b per year

1. Disbursement in 2018 USD value, excluding private donors; 2. based on historical growth. Source: OECD, World Bank, BCG Analysis

Private sector grants | Pandemic’s impact analysis reveals a **US \$1.5 bn** opportunity, with a mix of corporate & philanthropic donors

In Q2 2020, 92 companies generated +\$36 Bn in additional EBIT¹

A deeper review of earnings & existing operational leverage suggests a target of \$750 million

Q2 2020 additional EBIT by sector and marketplace

- In \$US billion

Distribution of companies by Q2 2020 additional EBIT

- In #

1. Difference between actual Q2 2020 Earning Before Interest and Tax (EBIT) and Q2 2020 forecast, based on 5-year CAGR; Source S&P Capital IQ;

2. Others include: Utilities, Industrials, Real Estate, Materials, Home entertainment

Social bonds | Most financing mechanisms would not work due to complexity & time to implement; social bonds could raise **US \$3 bn**

Assessment of specific financing mechanisms in terms of their suitability for closing the ACT-A financing gap

Social Bonds are the most appealing of the financing mechanisms explored, but still have limited potential

- There has been **strong recent market growth** on Social/Green/Sustainable bonds, fit for development organizations¹
- Social Bonds require binding pledges over time².
- The average social bond issue is **~\$600 m³**
- If market size and deal size maintain the same recent momentum, Social Bonds could realistically lead to a **US \$3 Bn opportunity for the ACT-Accelerator in 2021**

1. In 2014: \$0.5B issued by InterAmerican Development Bank. In 2017-18 \$2B from African Development Bank; 2. Donors issue social bonds explicitly to raise money for the global COVID-19 response, backed by firm pledges to bond-holders to pay over future periods, and provide the sum raised to countries or global health institutions as an upfront grant; 3. Source: Sustainable Bonds Insight 2020, Environmental Finance; iLab 2018 The Social Bond market: towards a new asset class? ITW with experts (incl. BMGF, Norway, Germany)

WBG MPA | Analysis of the last Multiphase Programmatic Approach suggests **US \$1.5 bn** of the new MPA could be gap-reducing by Q2 '21

Rapid execution of the 1st MPA¹ showed disbursement of >50% of funds in <6 months

With new products available (e.g. Vx, Dx, Dexa), we assume the proportion of MPA for tools will double

Analysis of the April IDA/IBRD MPA, in \$US billion

WBG new COVID-19 MPA, In \$US billion

1. MPA: Multiphase Programmatic Approach;
Source: World Bank COVID 19 Response MPA and Beyond, 15 October 2020

Exceptional additional ODA | Fiscal stimuli will continue through 2021 and may be the most realistic funding avenue for sovereign donors

Of the US \$12 Trillion in G20 stimuli since the start of the pandemic, US \$7.6 Trillion was 'cash'

History suggests that fiscal stimuli could repeat in 2021, with a similar order of magnitude

Domestic Fiscal stimuli since start of pandemic

- IMF covid-19 policy tracker, as of Dec 2020, in USD trillion¹

Fiscal stimulus response in Global Financial Crisis

- International Labor Org., OECD , in % total stimulus package

1. in real 2020 USD as of Dec 2020; 2. Includes India, Brazil, Australia, Indonesia, Turkey, Russia, South Korea, South Africa, Saudi Arabia, Argentina, Mexico;

Other mechanisms for LICs/LMICs | Financial mechanisms could be re-assessed for supporting liquidity with low impact on long-term debt

	 Access a large enough market	 Disburse funds by Q3 2021	 Can channel through ACT-A	 Work for highly-indebted countries	 Low/no impact on debt
New emission of SDRs	✓	✓	✗	✓	✓
Loan buy downs	✓	✓	✓	✓	✗
Debt swap	✗	✓	✓	✓	✓
Liquidity and Sustainability Facility	✓	?	✗	✓	✓

Key: is criteria met?

Yes

No

To be further investigated
